Our participation adopted by Osaka Prefecture about their public offering project to realize "Flying Mobility"

We, Aero Asahi Corporation (Headquarters: Tokyo, Toshinori Ogure, CEO) participated in a public offering project of Osaka Prefecture to realize "Flying Mobility".

Our suggestion "Air Mobility Integrated Flight Management Platform Business" was proposed in collaboration with Mitsui&Co., Ltd., Japan Aerospace Exploration Agency (JAXA) and Terra Drone Co., Ltd., and was adopted on August 27, 2021.

Project title:

Air Mobility Integrated Flight Management Platform Business

Project overview:

In order to realize transportation services utilizing flying mobility in urban areas in Osaka, it is important to manage airspace where widely various aircrafts including flying mobility, helicopters, drones, and etc. to fly safely and efficiently.

In order to establish an air mobility flight management platform by connection of different flight management systems, this year we will conduct demonstration experiments using helicopters and drones to verify a coordinated integrated flight management system.

Aero Asahi has been participating in the national public-private council and the "Osaka Roundtable for the Implementation of the Air Mobile Revolution Society", about new businesses related to "Flying Mobility".

We will continue to be actively involved in the field of flying mobility, including this project, with our philosophy "To the sky, For the future".
